- songs
- class activities
- word wall
- entrance cards

Promoting the program ...

- flyers
- video

So many Hebrew Schools are **raving** about the new **Hang with the Ten** program.

Here are some of their comments:

From Gilah Andrusier: In all honesty, I didn't elaborate too much on how superb it is because I thought your inbox must be full to overflowing because EVERYONE that I have spoken to that purchased it (at least 8 shluchos) are ravingggggg!..... Very clear instructions and very easy to navigate....the type setting etc is great...very smart how you give the outline and then accompanying pages....helps clarify.... The lessons are creative, original and most importantly the ideas are brought down to kids' level in hands on way....exciting for teacher to deliver....!

From Dvora Green: ... I just listened to the conference call [online teacher training], it really sounds great! So helpful for preparing the lessons.

From a Shlucha: Honestly I have not read every lesson but the few I have are excellent... In my humble opinion, and I have used many curriculum....this far surpasses them all...I say Wow!!

From a shlucha: The graphics are beautiful; I am sure the kids will be impressed. I'm excited to use the program. Thanks!

From Bayla Lesches: I know I have thanked you already but I just can't seem to get over this truly wonderful new curriculum. I read over all the lessons over the weekend and was blown away by what I saw and read. The detail that went into each lesson is unbelievable. From the graphics - where every divider has so much to learn from them, not just pictures but true lessons in themselves and even the luchos at the top have the letter highlighted in yellow corresponding to the dibrah - to the tactics used to explain the different lessons to the students, each one is so rich and enriching. ... I enjoy graphics and working with developing lessons and I understand the amount of time, patience and effort which goes into each process. I actually can't begin to calculate the amount of hours which have gone it to this. The lessons have not even begun to be taught and I am truly impressed, I look forward to putting them into practice. I will be forever grateful and amazed by this curriculum. I am not exaggerating.
